Welcome Message

Diabetic foot society of India is a prestigious organisation working for the spread of knowledge of diabetic foot problems for last 20 years.

The middle income and low income countries including India bear the brunt of increasing prevalence of Diabetes in the population. With better access, affordability and education the patients survive longer than a few decades ago. That also makes them susceptible to develop chronic complications like neuropathy and macrovascular problems. Every 20 seconds a foot is amputated and diabetic kidney disease becomes one of the foremost causes of renal failure.

The diabetic foot problems require a team work and are on the verge of embracing newer techniques, technology in improving the prognosis. It is mandatory for the health care providers to keep themselves updated.

This conference is expected to fulfil some of the learnings for updating their skills.

Relevant topics will be covered as entitled in the scientific agenda.

Dr Arati Shahade
Organising Chairperson

Dr. Advait Kothurkar
